FREE MEMORY SCREENING

National Memory Screening Day
THURSDAY, NOV 18
USF ST. PETE CAMPUS
BY APPOINTMENT
CALL 727-873-4090

- Concerned about memory changes? Want a memory check now for future comparison?
- As many as 5.1 million Americans have Alzheimer’s disease, and the prevalence doubles every five years beyond age 65.
- Trained USF St. Pete Psychology students will administer free, confidential, 25-minute memory screenings.
- Screening results are not a diagnosis, and individuals with below-normal scores or who have concerns are encouraged to pursue a full medical examination.
- All results are confidential.
