

Pathways To Change: Policy And Action For Resilience

iCAR

October 29, 2019

St. Petersburg is one of 25 US cities chosen for its vision and leadership on climate action

The Climate Challenge is designed to help cities meet climate goals

The **Climate Challenge** is a Bloomberg Philanthropies initiative that aims to **accelerate and deepen** U.S. cities' efforts to create the **greatest climate impact through 2020** and showcase the benefits – **good jobs, cleaner air, and cost savings** – that climate solutions bring.

St. Pete has made ambitious commitments to reduce its carbon emissions from buildings, transportation, and energy projects

Strategic municipal building energy retrofits

Expand municipal solar capacity

Engage the private sector in an energy efficiency challenge

New municipal funding programs for EE, renewables, and infrastructure

Scale up solar co-op model

Expand the Solar Energy Loan Fund (SELF) program

Develop new solar product for community benefit - Duke Collaboration

EV Education and incentives

Expand walking and bicycling networks across the city - Complete Streets Implementation

Expand Transit in connection to the BRT

The Climate Challenge will support these goals through 9 national expert organizations and many opportunities for peer learning
