CLIMATE SCIENCE 102: CHALLENGES AND OPPORTUNITIES OF THE CURRENT FOOD SYSTEM: WHAT WE EAT PLAYS A ROLE IN THE PRESERVATION OF OUR PLANET

iCAR's Community Climate Change Education series launches its second year of monthly speaker events on October 1st with a focus on the potential impacts of the current food systems and our choices of food on our planet. What are the opportunities and challenges to the current food system for sustainability?

Join us at 7 pm in the Boyd Hill Nature Preserve Education Center for this lively presentation and discussion. Free and open to the public.

**Presented at the
Boyd Hill Nature
